

Training

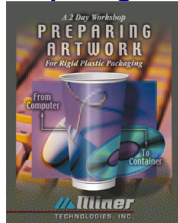

The ColorONE™ training programs were designed and developed based on Miner Technologies' experience in dry offset printing. We've walked in your shoes. We've felt the disappointment of rejected or returned products. We've felt the pride in meeting or exceeding our customer's expectations. We've compiled our printing knowledge in to 5 training seminars designed specifically to improve your dry offset printing department:

School of Dry Offest Printing

We designed this classed specifically for printing technicians. The comprehensive 3.5 day course covers everything a printing technician requires to print quality images efficiently.

Preparing Artwork For Rigid Plastic Packaging

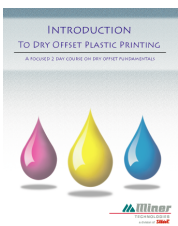

Dry offset plastic printing is considerably different than printing on paper. This information packed 1-day seminar will provide attendees with knowledge of designing and preparing artwork specifically for dry offset printing. This class is designed for plastic manufacturer's customer service and art departments, sales staff and for end users or art houses creating artwork for dry offset printing.

What Every Print Executive Needs to Know About Dry Offset Plastic Printing

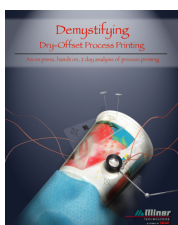

The 1-day seminar explores, discusses and generates action steps to providing answers to questions that affect a printing department's profitability. The seminar was develop and is lead by Ken Miner, former CEO and owner of Miner Container, specifically for executives who manage printing facilities.

Introduction to Dry Offset Printing

We've developed a 2-day beginner's seminar designed specifically for new hires in your printing department. The course covers the basics of dry offset printing. The course is designed to take a new hire and have them capable and comfortable with the basic operation of a dry offset printing press. We take them through an on-press, hands-on, 2-day course that touches on everything a new hire will require to run the press. Starting with safety and running through to setting up and running jobs, we've designed this course to allow you to focus on production and profitability instead of training new hires.

Demystifying Dry Offset Printing

Building on the Beginner's Seminar, we've developed a 2-day course that teaches press technicians how to print more complex, process jobs. This course is also hands on and on press. Your technicians earn everything from setting up jobs to troubleshooting printing problems in this course.
